MUSCLE & INJURY RECOVERY

Pain relief has been a top requested service this summer; so we continue to look for innovative ways to help. **One highly successful option is Radio Frequency (RF) for soft tissue (muscle, tendons, ligaments) pain and inflammation.** It is helpful for both chronic and acute pain and inflammation, including arthritis.

RF is a machine-based procedure where radio waves heat up a small area of tissue, which reduces the pain signal and inflammation in the specific area. During the treatment the patient will experience a deep thermal massage sensation that therapeutically relieves pain.

Recent studies show that as few as 2-4 treatments scheduled weekly or every two weeks may significantly reduce pain for 6-12 months. **Over 70% of patients respond well to radio frequency treatment for pain management.** Our RF device also combines Pulsed Electro Magnetic Therapy (PEMF) with RF to further enhance its efficacy. PEMF is commonly used to reduce back pain and peripheral neuropathy (nerve pain).

**Relief for chronic and acute
pain utilizing
Radio Frequency**

**No need to suffer through joint and
body pain any longer.**

**Radio Frequency for Pain
\$200 for 20-minute treatment**
